**Figma Wireframe Link (view only)**:
https://www.figma.com/site/uYTFru72p95SSzlykYt1BM/Job-Board-Page?t=fUCuBlBgIT0Hmamv-1

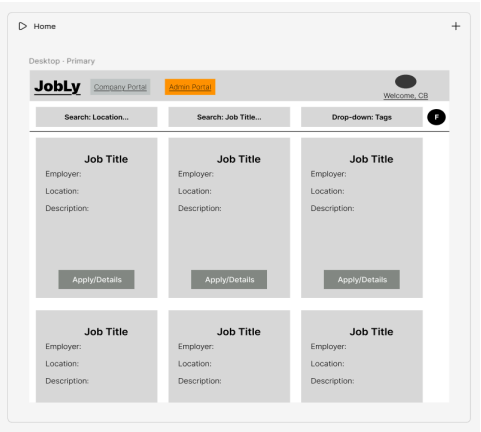
**Navigating the Wireframe**:
To navigate through our group's wireframe, you can start by clicking the play button on the **Home** page (located in the very top left) - picture of the home page below. You can also click the preview option located on the right panel with a play button (will take you directly to Home).

Once you've loaded into the wireframe, you are able to navigate around using the "Company Portal," "Admin Portal" and "Profile" page (top right). To return back to the home page, simply click on the JobLy text! As this is a wireframe, the majority of the pages won't have actual functionality, but you will be able to access some example popups in any of the portals. Popup accessibility can be seen by following any of these paths.

- Company Portal > Create New Job Posting
- Company Portal > Edit Job Posting
- Profile > Edit Profile
- Admin Portal > Find Users Dropdown > Analytics > New Admin
- Home > Apply/Details
- Company Portal > Company Profile Settings > Edit Profile

**YouTube Video Wireframe Walkthrough/Overview**:
https://youtu.be/I76s010y2Ps

**Home Page**:
This is the home page, and the page that users will first be presented with.

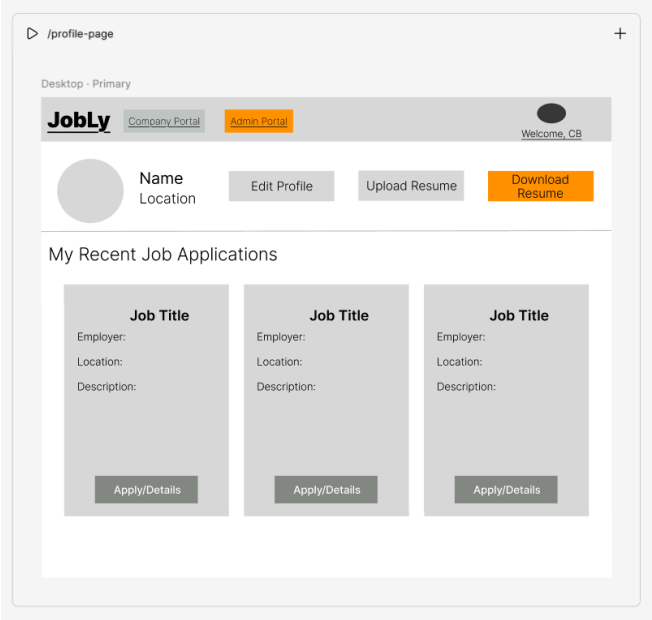


The "Company Portal" and "Admin Portal" button will only be presented to those respective accounts **IF** they are

logged in I.e. if a company account is signed in, they will only see the “Company Portal”, but not the admin portal.

If an admin account is signed in, they will only see the “Admin Portal" button, but NOT the company portal button.

If a user, or a non-user, is browsing the site they will not be able to see either company or admin portals, and only signed in users will be able to have the welcome message under their profile picture.



**User Profile**:
The user profile is accessible to registered users that are signed in, admins, and job posters. By clicking on the “Welcome, CB” profile section, the user is taken to their profile page.

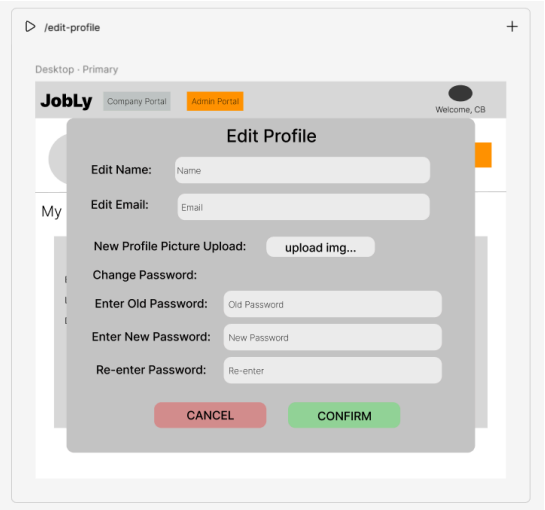
Once in the profile section, users are able to edit their profile, upload a resume, or download their resume.

Under the profile section, users will be able to see any jobs they have applied to or ordered by the most recent application. Further applications will be loaded below.

**Edit Profile Popup**:
The edit profile popup opens on the page if the user clicks the “Edit Profile” button seen above next to user details.

Once in the popup, the user has the option to update their name, email, upload a new profile picture, and change their password.

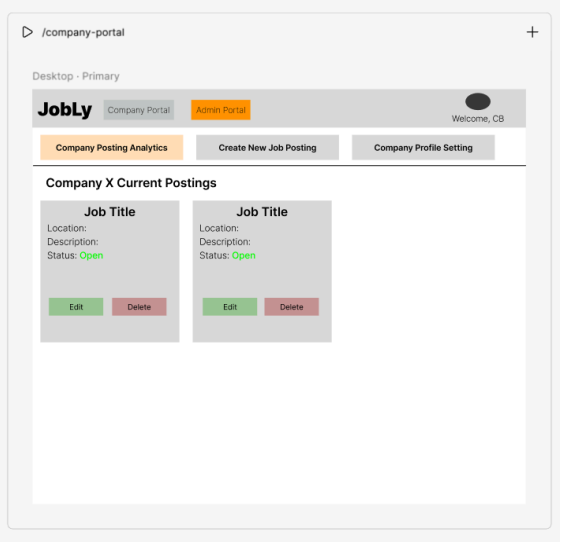
As the upload image action item can’t be a text box, “upload img…” will be a button allowing the user to upload a picture.



**Company Portal Page**:
From the company portal page, logged in company job posters will be the ONLY ones who can see this page. Admins, registered and non-registered users will not have access to this page.

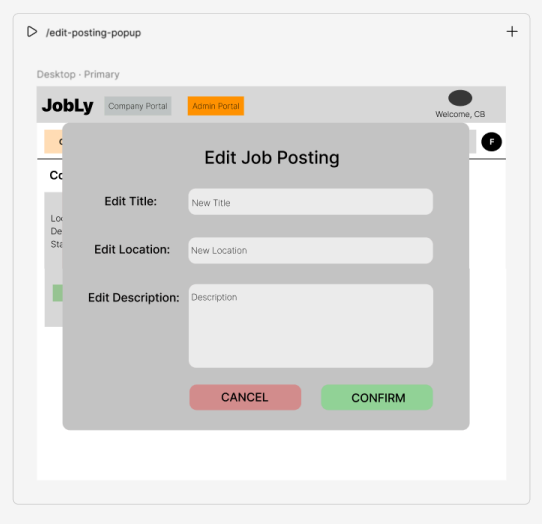
From the company portal page, job posters have the ability to see their company's analytics (jobs posted, people hired, number of applicants, etc.), create a new job posting, and update the company profile.

Further below, company members can see their job postings, and have the option to edit or completely delete them.



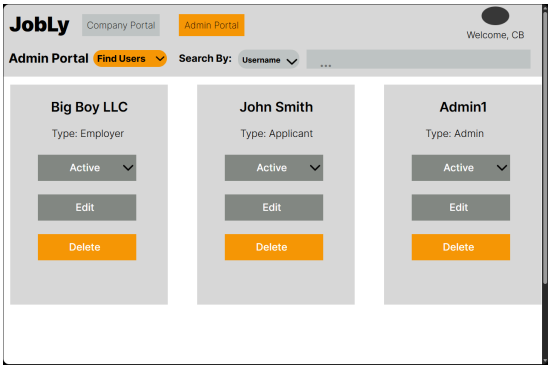
**Edit Job Posting Popup**:
The edit job posting popup is in the company portal page and allows job posters to edit a job posting.

From this popup, job posters are able to change job title, edit job location, and edit the post description. The x does not work on the figma, but it would just get rid of the popup.



**Admin Panel (Find Users)**
This Page allows admins to find all users on JobLy and change their status (active or inactive), edit their account, or delete their accounts.

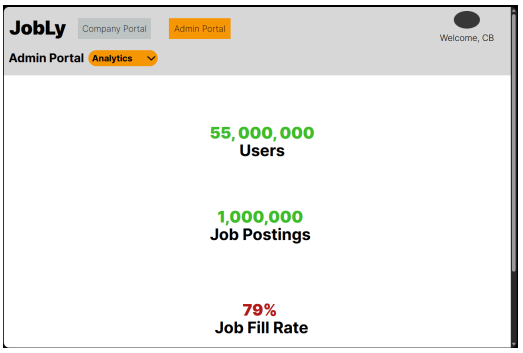
From the drop down by admin portal you can go to other admin tool like create new admin and analytics.



## Admin Panel (Analytics)

This page gives a brief summary of the site and how it is doing. If numbers are green they are above a set goal and ff red, they are below.

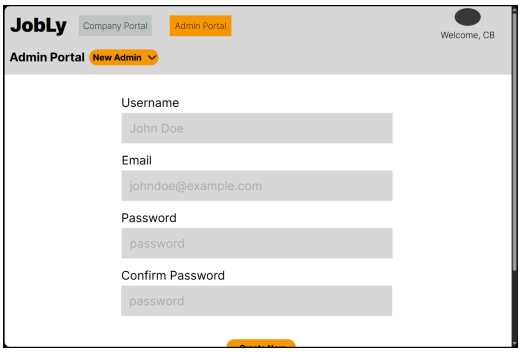
From the drop down by admin portal you can go to other admin tool like create new admin and analytics.



## Admin Panel (Create Admin)

This page allows an admin to create a new admin account for a new administrator.

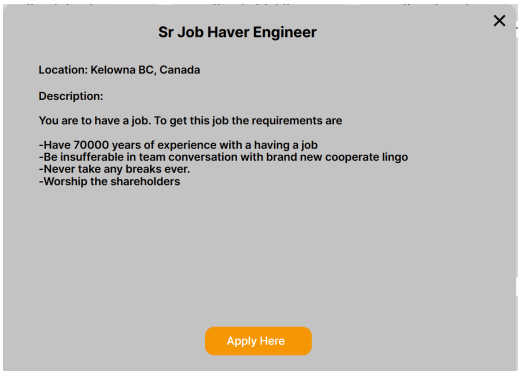
From the drop down by admin portal, you can go to other admin tools like create new admin and analytics.



## Job Details Popup

This page gives you job details.

The x does not work on the figma but it Would just get rid of the popup.

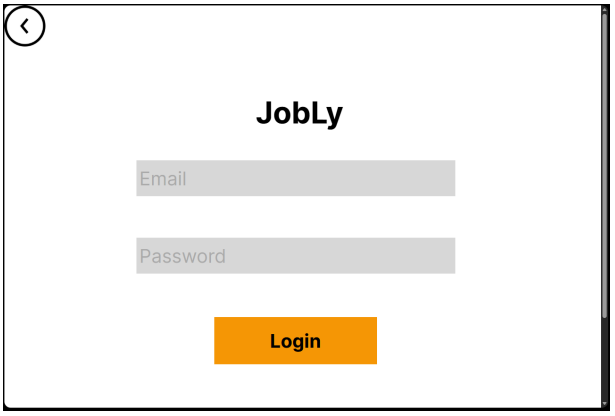


## Login Type Page

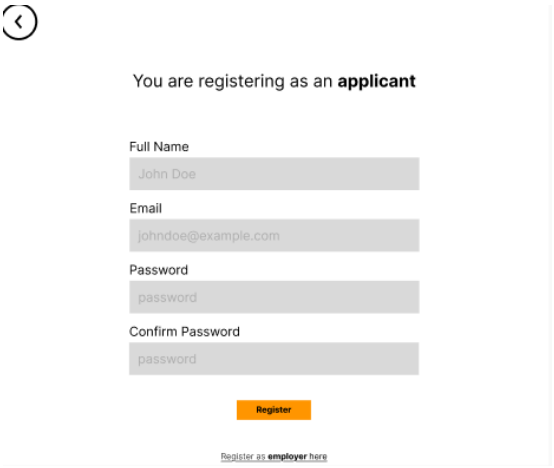
This is where users declare what type of account they are logging in with.

To get to here, click the login button. There is also a link to the registration page which would be where the profile button is on the header.

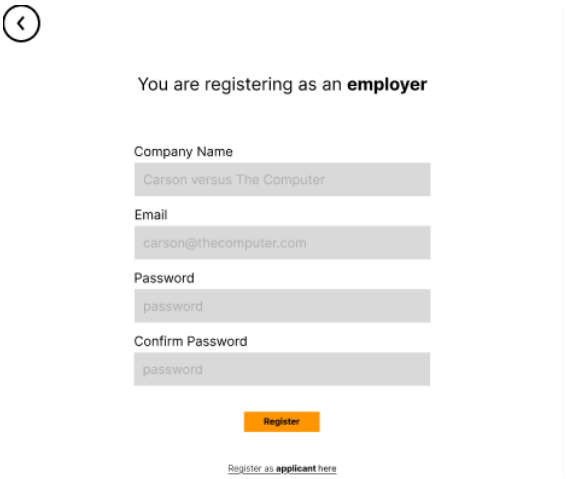
**Login Page**
Simple login page with a login button that returns the user to the previous page they were on before they started logging in (e.g. the home page).



**Register Page (Applicant)**
If users choose the Applicant option on the Login Type Page, they are taken to a form where they must input their name, email, and password. If they accidentally picked the wrong user type they can either go back to the login type page (via arrow on top left), or click *here* at the bottom to switch to an employer account. The register button returns the user to the previous state before they began registering (e.g. the home page).

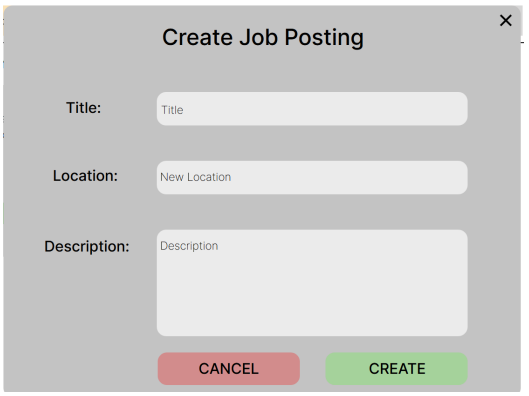


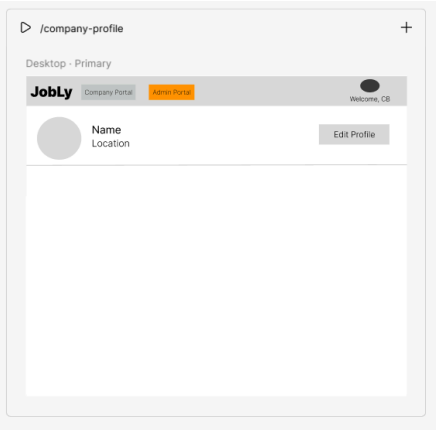
**Register Page (Employer)**
If users choose the Employer option on the Login Type Page, they are taken to a form where they must input their company name, company email, and password. If they accidentally picked the wrong user type they can either go back to the login type page (via arrow on top left), or click *here* at the bottom to switch to an applicant account. The register button returns the user to the previous state before they began registering (e.g. the home page).



**Create New Job Posting Popup**
Companies can make new job postings here.

The x does not work on the figma but it would just get rid of the popup.



**Company Profile**:
The company profile allows organizations the ability to update their profile picture, name, email address, and organizational password by clicking the edit profile button. The edit profile popup is the same seen in the edit personal profile popup.


The organizational profile page will only be accessible from the company portal, so regular users and non-registered users will not have access to this page.
